

Installation Virtual Operations and Information Center (IVOIC)

Flood Control Update Brief

6 April 2011

Matt Barden
Chief, Plans & Operations

To provide the Army the installation capabilities and services to support expeditionary operations in a time of persistent conflict, and to provide a quality of life for Soldiers and Families commensurate with their service.

We are the Army's home

Flood Control Update Brief

Purpose:

To inform the tenants of Rock Island Arsenal of the impending flood and provide a timely and comprehensive flood status update.

Flood Control Update Brief

In preparation for the forecasted flood, crews will begin erecting a flood wall on top of the north levee from Gillespie Street to the east end of the Island.

As this operation begins, this area will be designated as a restricted area, barricaded, and only be used by security and personnel working the flood situation.

We appreciate everyone respecting the designated restricted area and not walking, jogging, or driving in these areas. As the river level rises, additional areas will become restricted.

Flood Control Update Brief

SITREP a/o 5 Apr 11

As of now the flood forecast through Apr 13th shows the river starting to level off at or around the moderate flood level of 16.4'. This doesn't mean we are in the clear, just means the weather conditions have been favorable. Increased flooding and risk would be caused by rapidly increased snow melt up north and precipitation up north or in the QCA over the next few weeks. Preparedness/Mitigation updates are as follows:

1. Current flood prediction for the next week do not warrant any further Hesco installations at this time.
2. Delivery of bulk sand to be completed today.
3. Continuing to install rip rap on the water side of the north levee to protect from erosion.
4. Continuing to monitor flood predictions.

Flood Build-Up (2011)

- Plan
- Install sandbags & Hescos
- Train Levee teams
- Coordinate
- Operate RIAG EOC

- Operate DPW ICC
- Inspect levees
- Increase STRATCOM
- Plan/coordinate

- Operate DPW ICC/RIAG EOC 24/7
- Inspect levees 24/7
- Increase communications with community
- MDMP/Plan COOP & Evacuation

RFIs

1. Should the flood waters reach such a level to constrain (but not totally prohibit) traffic onto RIA and tenant mission performance; how will the guard force implement further access control limits to only allow entrance of those authorized by each tenant for high priority MEFs?
 - As of now we currently don't have MEF rosters built into the RCx (the vetting system used for access control). We have the capability to build rosters into the system but it becomes a matter of maintaining rosters and pushing updates to the DES for the RCx system. This is an issue that will require further analysis from COOP planners on the installation and the DPTMS & DES.
